Q2 How do you think GRASS should start when the last mapset is not in a usable state (was deleted or is in use)?

Answered: 52 Skipped: 0

ANSWER CHOICES	RESPONSES	
I suggest to bypass the startup screen and start in Demolocation.	19.23%	10
I suggest to show a modernized version of the startup screen in this situation.	61.54%	32
If not capable, please share your own idea:	19.23%	10
TOTAL		52

#	IF NOT CAPABLE, PLEASE SHARE YOUR OWN IDEA:	DATE
1	either in demo location or with a popup message saying the last used mapset is not available, hence opening in first location/mapset in the grassdata	10/26/2020 11:07 AM
2	I suggest to bypass the startup screen (as it is gone anyway), show an error and let the user either exit or offer to start in Demolocation.	10/24/2020 2:23 PM
3	Guide the user to create a permamnent area - basically, guide the user as if s/he was a new user and needed to know and create the essentials that GRASS need to start functioning.	10/24/2020 11:23 AM
4	What if the user deletes the demolocation? Is it created 'on the fly'? Also, the startup screen has some interesting information to the new user (what is a location / mapset). So maybe a wizard that creates the demolocation and explains what is a database / location / mapset would be interesting. That wizard could also have an option for advanced users to skip the intro and choose the correct location/mapset	10/23/2020 8:10 PM
5	I like it the way it is	10/23/2020 4:43 PM
6	Bypass the startup and start in world lat long location with basemaps.	10/23/2020 4:22 PM
7	It should prompt the error and afterwards, with a timer, default to the a default mapset or a clean one	10/23/2020 2:24 PM
8	If it is easy to change the location or mapset once already within the new DataCatalog, I would suggest to bypass the startup screen and start in Demolocation. Then, if the user wants, it can create a new location or change to another location. If this is not easy (for newcomers), then I would suggest a modernized version of the startup screen.	10/23/2020 2:00 PM
9	Warning is should be given.	10/23/2020 1:00 PM
10	Shows an empty data catalog with a dialog in front: Last used maps is not accessible. Please select one of the following options: - create new one at ... - select other existing one... (could possibly combined with previous one) - quit	10/23/2020 12:09 PM

Q3 Please, rank how useful these features in Data Catalog would be (or already are) for you (1 = the most useful).

Q4 Which features would you like to add?

Answered: 24 Skipped: 0

#	RESPONSES	DATE
1	relevant Drag and drop vector/raster layer(s) into map window.	10/29/2020 7:18 AM
2	relevant I may not be familiar with this feature if it already exists, but I would like to see an easier process to access WMS/WFS.	10/26/2020 4:07 PM
3	relevant A new management icon for region settings	10/26/2020 3:40 PM
4	relevant New management icons	10/26/2020 3:30 PM
5	relevant - filtering of maps shown in list	10/26/2020 12:43 PM
6	relevant Zoomtolayer in context menu	10/26/2020 11:07 AM
7	relevant How to support the use case that a user receives a GIS file and wants to create a new location from it?	10/24/2020 2:23 PM
8	relevant ability to import and restructure projects from other gis programs	10/24/2020 10:24 AM
9	relevant More friendly layers-coloring, ie accessible from the layer tree already (rather than via accessing a function)	10/24/2020 10:02 AM
10	relevant Clear link to startup help for first time users explaining map sets, regions, etc. maybe that as a startup dialog in lieu of the old dialog.	10/23/2020 10:45 PM
11	relevant all relevant are already in the list	10/23/2020 9:05 PM
12	relevant Create the Demo Location with most common web map EPSG	10/23/2020 8:14 PM
13	relevant Easily move items between mapsets / locations?	10/23/2020 8:10 PM
14	relevant zoom capability with mouse without messing up the window. (intuitive zoom)	10/23/2020 4:41 PM
15	relevant None to my limited knowledge (<6 month Grass user).	10/23/2020 4:40 PM
16	relevant Add WMS button? Streaming basemaps from WMS like stamen, mapbox, etc...	10/23/2020 4:22 PM
17	relevant improve ui	10/23/2020 3:14 PM
18	relevant The EPSG code in parenthesis just after the location name	10/23/2020 2:42 PM
19	relevant Show mapset EPSG next to the mapset's name in the catalog (or at least be able to toggle that information on/off, default off)	10/23/2020 1:53 PM
20	relevant add some fun "easter egg" tricks, like QGIS has.	10/23/2020 1:50 PM
21	relevant Delete more than one layer via context menu	10/23/2020 1:47 PM
22	relevant Cloning a location	10/23/2020 1:37 PM
23	relevant I would like to see space-time datasets - STDS listed too (and when clicking on the STDS name see the maps registered within them). Also, I would like to see saved workspaces somewhere in the data catalog.	10/23/2020 1:28 PM
24	relevant Services icon	10/23/2020 12:47 PM

Q5 Because we have limited screen space, we need to think about where we can add new features. Where would you add them?

Answered: 52 Skipped: 0

ANSWER CHOICES	RESPONSES	
To context menus in Data Catalog	40.38%	21
To management icons	21.15%	11
To both	25.00%	13
I don't think any features should be added. There is little space for that.	13.46%	7
TOTAL		52

Q6 So, what do you think about the following statement? I would start GRASS using the file association of the workspace file (.gxw) frequently.
