

Q4 What software do you think does a good job of providing a good first-time user experience? (optional)

Answered: 15 Skipped: 14

#	RESPONSES	DATE
1	QGIS because it takes users to their data immediately rather than setting projects and folders. Creating location etc. is too old.	10/27/2020 3:04 PM
2	QGIS	10/26/2020 3:49 PM
3	Slack	10/24/2020 3:11 PM
4	I would consider the particular way QGIS writes help pages to be exemplary. The large pool of help videos by experts and users does the rest.	10/24/2020 1:41 PM
5	Probably QGIS.....	10/24/2020 11:11 AM
6	slack	10/24/2020 10:07 AM
7	Adobe photoshop	10/23/2020 4:47 PM
8	google docs	10/23/2020 4:45 PM
9	Discord	10/23/2020 4:43 PM
10	adobe photoshop	10/23/2020 4:42 PM
11	I really like (old) QGIS simple UI	10/23/2020 3:22 PM
12	Solidworks Ansys	10/23/2020 2:33 PM
13	For someone completely new to GIS, none I would say. For users who some experience/knowledge in GIS I would say QGIS	10/23/2020 2:05 PM
14	tough to say...	10/23/2020 1:56 PM
15	QGIS, it feels more intuitive, at least for the first experience of displaying a map. I really like to have everything in a single window, too. It's less confusing.	10/23/2020 1:38 PM
